## Part 2

Check if the POST request accept params, queries, and/or a body. Which one(s) and what information is it expecting to be sent? **Body**

What data type does the GET request return? **Array**

What would the URL look like for deleting the post with the id 555? (This post does not exist anymore, but the syntax is the same for existing posts)

**<https://practiceapi.devmountain.com/api/posts?id=555>**

List the possible response codes from the GET request at /posts/filter

**409 200**

Create a post whose text is your name, record the URL and body here:

<https://practiceapi.devmountain.com/api/posts?id=156>

```
{
```

```
"id": 156,  
"text": "Natalie Jones",  
"date": "03 Nov 2021"  
},
```

What would the URL and body object be to update the post you just made to contain your favorite color instead of your name?

<https://practiceapi.devmountain.com/api/posts?id=156>

```
{  
  "id": 156,  
  "text": "Grey",  
  "date": "03 Nov 2021"  
},
```

What is the URL to get posts that contain the text “blue”?

<https://practiceapi.devmountain.com/api/posts/filter?text=blue>

Make a request to GET all the posts. What are the content type and charset of the response?  
(Hint: look on the Headers)

content-type: application/json; charset=utf-8

What would cause a PUT request to return a 409 status?

Request was missing req.query.id or req.body.text

What happens if you try to send a query in the GET request URL? Why do you get that response?
